Reading comprehension 1:

Education is an information-processing activity which requires the teacher not only to communicate information, but to adapt to his student, to interpret the student's response, and to generate new specific material. The ability of the computer teaching machine to perform these last three tasks-though as yet it cannot perform them all well-is what allies it with the human tutor and distinguishes it both from types of teaching machines and from non-automated teaching techniques now in use.

31- Which word can best fill the blank in the last sentence?

1. another 2. other 3. the other 4. the another

32- The phrase what allies it with the human tutoring implies that computer teaching machines can

1. help the human tutor 2. be better than the human tutor
3. not be better than the human tutor 4. disturb the classroom context

33- Which one has **NOT** been mentioned in the text as a role of teacher?

1. Developing materials
2. Communication with students
3. Adaptation to students
4. Students' responses analysis
