امام علی^(ع): شرافت به خرد و ادب است نه به دارایی و نژاد.

- Enumeration as a source of obtaining data in research is a subcategory of
a. Induction b. Deduction c. Sensory experience d. Expert opinion
- Observability in research is a major principle of
a. Logic b. Generalization
c. positivism d. manageability
- The idea that research is additive is an attribute of..... of research.
a. Replicability b. Systematicity
c. Reductivity d. Generativity
- Scientists, neurologists for instance, who investigate the brain in term of its mechanism are doing.....research.
a. Confirmatory b. Pure c. Experimental d. Applied
- The final step of conducting research is
a. Problem solving b. Hypothesis testing
c. Interpretation of data d. Reporting findings
- A researcher interested in the role of field-dependence in language learning is basically using a/an domain for his/her research.
a. Affective b. Cognitive
c. Social d. Linguistic
- A question about the best time of learning vocabulary by EFL learners is aone.
a. Conversational b. Casual c. Descriptive d. Cause-effect
- Variables which can be measured objectively are called variables.
a. concrete b. abstract c. discrete d. continuous
- The decision on selecting a directional or a non-directional hypothesis
a. is Arbitrary b. depends on easiness of manipulation
c. is based on researcher's will d. depends on evidence in the literature
- The focus of literature review should be on all the following areas EXCEPT
a. Methodology b. theory
c. Data analysis d. Suggestion for further research
- Which of the following is acceptable in MLA style for the citation of a source in the bibliography?
a. Arshia, s.(2010). b. Soleimani, Arshia (2010).
c. Soleimani, Arshia d. Soleimani, A.
- Nationality and human sex are examples of..... variables.
a. abstract b. continuous c. concrete d. discrete
- In language teaching research, "bilingualism" is mainly about variable.
a. Concrete b. Abstract c. Discrete d. Continuous
- A definition which deals with the variable in terms of its measurable characteristics is a/an definition.
a. Theoretical b. Operational c. Abstract d. Concrete
- For a researcher studying the role of first language background in learning new vocabulary, L1 is measured using thescale.
a. Ordinal b. Nominal c. Internal d. Ratio

کد سری سؤال: یک (۱)

16. Two variables always necessary in a research hypothesis are.....
 - a. Intervening-independent
 - b. Intervening-dependent
 - c. Dependent-independent
 - d. Independent-intervening
17. All the followings are purposes of historical researches EXCEPT
 - a. Comparison
 - b. Explanation
 - c. Prediction
 - d. Retelling
18. Historical researchers evaluate two accuracy of documents through
 - a. Direct observation
 - b. Internal criticism
 - c. Tests of signature
 - d. External criticism
19. Ex-post-facto is a subcategory ofmethod of research.
 - a. Experimental
 - b. Survey
 - c. Inter-relational
 - d. Developmental
20. A researcher studying acquisition of negation by children is doing a/an research.
 - a. Case study
 - b. Field study
 - c. Survey
 - d. Ex-post-facto
21. A similarity between causal comparative and experimental methods is their
 - a. Degree of manipulation
 - b. Cause-effect relation
 - c. External validity
 - d. Internal validity
22. For a researcher to study the acquisition of question forms in English, amethod will be recommended.
 - a. Survey
 - b. longitudinal
 - c. Cross-sectional
 - d. Co relational
23. Internal validity in experimental research refers to
 - a. Generalization
 - b. Replicability
 - c. correlation
 - d. Cause-effect claims
24. Which of the following research method is rarely applicable in educational settings?
 - a. True experimental
 - b. Pre-experimental
 - c. Quasi-experimental
 - d. Ex-post facto
25. For research outcomes to be dependable, is necessary.
 - a. Post-testing
 - b. Representativeness
 - c. No mortality
 - d. Ethics
26. The treatment used in an experimental research is basically related to thevariable.
 - a. Independent
 - b. Dependent
 - c. Control
 - d. Intervening
27. For classroom research in educational settings, when randomization is not possible, the solution is.....
 - a. Sample size
 - b. Encouragement
 - c. Chance effect
 - d. Matching
28. effect refers to any process that involves systematic changes over time, regardless of specific events.
 - a. maturation
 - b. selection
 - c. testing
 - d. history
29. Which of the following is not mentioned in the bibliographical information of a book?
 - a. Author full name
 - b. Title
 - c. Publisher
 - d. Chapter
30. To conduct a research, at leastvariables are essential.
 - a. One
 - b. Two
 - c. Three
 - d. Four
