

زمان آزمون (دقیقه): تستی: ۷۰ تشریحی: ۰

تعداد سوالات: تستی: ۳۰ تشریحی: ۰

عنوان درس: اصول و روش تحقیق ۱

رشته تحصیلی/کد درس: مترجمی زبان انگلیسی، آموزش زبان انگلیسی ۱۲۱۲۰۸۳ - زبان و ادبیات انگلیسی ۱۲۱۲۱۲۶

1- In ..... reasoning, one moves from a general statement of truth to a more specific one.

1. inductive                      2. deductive                      3. systemic                      4. generalizing

2- ..... is a system of philosophy that excludes everything from its consideration except natural phenomena and their interrelations.

1. observable phenomena                      2. logical positivism  
3. scientific method                      4. logical thinking

3- What two concepts form the foundation of 'systemic approach' in research?

1. systematicity & uniformity                      2. c. constancy & reductivity  
3. constancy & uniformity                      4. generativity & replicability

4- In which research, researchers face many unexpected situations in which different factors interact and create new situations?

1. reductive                      2. replicable                      3. logical                      4. generative

5- Which one is NOT the main goal of scientific research?

1. Discussion                      2. Description                      3. Prediction                      4. Explanation

6- Which research follows a trial and error procedure to find out something about an unknown phenomenon?

1. confirmatory                      2. pure                      3. exploratory                      4. Applied

7- A systematic group of courses or sequence of subjects required for graduation or certification in a major field of study is called .....

1. research                      2. instruction                      3. methodology                      4. curriculum

8- Strategy , process and style are the terms used in the domain of ..... factors.

1. cognitive                      2. social                      3. technological                      4. political

9- Determining the appropriateness of the materials being presented to the learners is referred to ..... analysis.

1. text                      2. content                      3. discourse                      4. corpus

10- Which one has a considerable effect on language learning?

1. anxiety                      2. attitude                      3. self-esteem                      4. emotion

11- Motivation is one of the most important ..... factors.

1. cognitive                      2. social                      3. Affective                      4. personality

12- In order to appreciate literature, linguistic knowledge along with ..... awareness is necessary.

1. syntactic                      2. semantic                      3. social                      4. cultural

13- Which one of these factors influences the formulation of the research question?

1. observation                      2. relevance                      3. interest                      4. manageability

14- In which of the following research questions they ask about the sequence of events?

1. cause-effect                      2. hypothesis                      3. Descriptive                      4. correlational

15- In correlational questions researchers are interested in finding out the relationship between language abilities and ..... factors.

1. social                      2. affective                      3. cultural                      4. mental

16- The statement made on the possible outcome of research is called a/an ..... .

1. hypothesis                      2. prediction                      3. alternative                      4. generalization

17- If a factor has been overdone by previous researchers ..... helps them.

1. scientific perspective                      2. review of literature  
3. systematic procedure                      4. manageable topic

18- Which includes information about the subjects who participated in the study?

1. theory                      2. method                      3. data analysis                      4. literature review

19- What is the most valuable and informative source of information?

1. Encyclopedias                      2. Dictionaries                      3. Periodicals                      4. Almanacs

20- In ..... style, the author's first and middle names are often initialized.

1. APA                      2. IPA                      3. MLAT                      4. MLA

21- Which of the following scales of measurement is the only one that has an absolute zero point.

1. Ratio                      2. Nominal                      3. ordinal                      4. interval

22- The main difference between concrete variables and abstract variables lies in .....

1. objectivity                      2. height                      3. measurement                      4. direction

23- This variable changes the general outcome of research.

1. Dependent                      2. Independent                      3. Control                      4. Moderator

24-The 'intelligence quotient'and 'sex' are kinds of ..... variables.

1. control & moderator
2. moderator & control
3. Dependent & moderator
4. control & intervening

25-The following are advantages of historical research EXCEPT .....

1. Insights into the solution of the contemporary problems.
2. Consolidating a position on an issue.
3. Understand cause and effects of cultures.
4. suggestions for future state of affairs.

26-The research should go through the following steps to conduct a historical research Except .....

1. formulate the problem
2. find a question
3. formulate hypotheses
4. collect data

27-In historical research, official and nonofficial records and physical remains are the major .....

1. tools of data collection
2. problems
3. sources of information
4. findings

28-External criticism is performed in order to check ..... of the document.

1. accuracy
2. truthfulness
3. correctness
4. authenticity

29-The following cases are different factors that are taken into account in conducting survey EXCEPT .....

1. complexity of data
2. specification of purpose
3. types of information
4. instrument in data

30-In which case, the researcher attempts to observe the changes in the behavior of his subject?

1. direct observation
2. non verbal behavior
3. dysphonia
4. height
